Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 15, 16, 18, and 19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

1. Applicant's election of Species A in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4, 11, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Von Holten.

Von Holten shows all of the basic device including a material spreader mounted on a truck 40 with a trough composed of elements 20 and 30, two conveying mechanisms, and motors 200 and 240. The method would be inherent during the normal use and operation of the device as claimed. Further, to have two different speed would be inherent since they are controlled by two separate motors.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 8-10 and 12-13 are rejected under 35 U.S.C. 103(a) as being

unpatentable over Von Holten in view of Bogenschutz.

Von Holten shows all of the basic device except for a spinner. Bogenschutz shows another material spreader with a spinner 112 and adjustable chute 115 and 116. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Vo Holten device to have a spinner and adjustable chute as taught by Bogenschutz to achieve the desired spray pattern.

6. Claims 5-7, 14, and 17 are rejected under 35 U.S.C. 103(a) as being

unpatentable over Von Holten in view of Barber et al.

Von Holten shows all of the basic device except for an auger. Barber et al. Shows another material spreader having an auger 30. It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Von Holten device to have an auger as taught by Barber et al. since this is a substitution of one equivalent conveying means for another that would achieve the same result.
